Understanding the SAT

What is the SAT?

The SAT is a standardized test that measures a high school student's readiness for college. It evaluates skills in three core areas:

1. Evidence-Based Reading and Writing (EBRW): This section assesses reading comprehension and writing skills through passages and related questions.
2. Math: The Math section includes questions on algebra, problem-solving, data analysis, and advanced math concepts.
3. Essay (optional): Though optional, some colleges may require or recommend the SAT essay, which assesses a student's ability to read a passage and write an analytical response.

Structure of the SAT

The SAT consists of several sections, each with a specific number of questions and time limits. The total testing time for the SAT is approximately 3 hours, with an additional 50 minutes for the essay if the student chooses to take it. The sections are as follows:

- Reading: 52 questions, 65 minutes
- Writing and Language: 44 questions, 35 minutes
- Math (No calculator): 20 questions, 25 minutes
- Math (Calculator): 38 questions, 55 minutes
- Essay (optional): 1 task, 50 minutes

The SAT is scored on a scale of 400 to 1600, combining the scores from the EBRW and Math sections.
