The grip is textured for secure handling under various conditions, with an ergonomic shape that fits naturally in the hand. The polymer frame contributes to weight reduction, making the pistol easier to carry for extended periods. The frame also integrates well with the manual safety lever, positioned within thumb's reach for quick engagement or disengagement.

Slide and Sights

The slide is manufactured from stainless steel and treated with durable coatings to resist wear and corrosion. It features serrations at the front and rear for improved manipulation.
