Product Overview

The simplehuman 40l slim step can is a durable and sleek waste container designed to fit neatly into narrow spaces while offering a generous 40-liter capacity. Constructed with fingerprint-resistant stainless steel, it combines functionality with a modern aesthetic. The slim profile is ideal for tight kitchens or workspaces where floor space is limited but waste capacity remains a priority. Key features include a quiet-close lid, a strong steel pedal for hands-free operation, and an integrated liner rim that keeps bags neatly in place. Understanding the product's design and features is the first step in effectively using and maintaining the simplehuman 40l slim step can.

Design and Materials

The can's outer shell is made from high-quality brushed stainless steel, which resists smudges and scratches, maintaining a clean look with minimal upkeep. The step pedal is engineered for durability and reliability, ensuring smooth lid operation over time. Internally, the can includes a removable plastic bucket that simplifies the process of emptying waste and cleaning. The bucket is lightweight but sturdy, designed to fit snugly within the steel frame.

Dimensions and Capacity

The simplehuman 40l slim step can measures approximately 25 inches in height, 12 inches in width, and 13 inches in depth, making it a compact solution for limited spaces. Its 40-liter volume supports daily household or office waste disposal needs without requiring frequent emptying.

Step-by-Step Usage Instructions

Proper operation of the simplehuman 40l slim step can ensures hygienic, hands-free waste disposal, contributing to a cleaner environment. The following instructions detail how to use the step can correctly and safely.

Opening the Lid

To open the lid, press down firmly on the steel foot pedal located at the base of the can. This mechanism lifts the lid smoothly and quietly without requiring hand contact. It is important to apply steady pressure for efficient lid operation. Avoid stomping or using excessive force as this may damage the pedal or lid mechanism.

Closing the Lid

The lid closes automatically and silently once the foot pedal is released. The quiet-close technology prevents slamming, reducing noise and wear on the can. Ensure the lid fully closes to contain odors and maintain a clean appearance.

Removing the Inner Bucket

When the can is full, remove the inner plastic bucket to empty the contents. To do this, open the lid fully by pressing the pedal, then lift the bucket out by its rim. The bucket's lightweight design facilitates easy transport to the waste disposal area.

Replacing and Securing the Liner

Using the correct liner and securing it properly is essential for preventing leaks and keeping the can clean. The simplehuman 40l slim step can is designed to accommodate large 40-liter liner bags with a specific fit system.

Selecting the Right Liner

Use simplehuman brand liners or compatible 40-liter trash bags that fit the slim profile of the can. Bags that are too large may bunch inside the can, while smaller bags can slip down and cause messes. Always check the liner size before purchase to ensure compatibility.

Installing the Liner

1. Open the lid using the foot pedal.
2. Place the liner inside the inner bucket, ensuring the bag's edges fold over the bucket rim evenly.
3. Use the built-in liner rim on the can's interior to secure the liner in place, preventing it from slipping when waste is deposited.
4. Close the lid slowly to verify the liner is properly seated and does not obstruct the lid from closing.

Removing the Liner

When the liner is full, open the lid fully and carefully lift the inner bucket out. Tie the liner securely at the top before disposing of it. Replace with a new liner following the above installation steps.

Cleaning and Maintenance Tips

Regular cleaning extends the life of the simplehuman 40l slim step can and prevents odors and stains. Following manufacturer-recommended maintenance practices is essential for optimal performance.

Exterior Cleaning

Wipe the stainless steel exterior regularly with a damp microfiber cloth to remove fingerprints, dust, and spills. For more stubborn stains, use a mild detergent diluted in water. Avoid abrasive cleaners or scrubbers that could scratch the surface.

Inner Bucket Cleaning

The removable bucket should be cleaned frequently with warm, soapy water. Rinse thoroughly and allow to dry completely before reinserting it into the can. This prevents bacteria buildup and odors.

Pedal Mechanism Maintenance

Inspect the pedal mechanism periodically for dirt or debris that may impair smooth operation. Wipe the pedal area clean and apply a small amount of lubricant if needed to maintain quiet and efficient lid movement.

Troubleshooting Common Issues

Despite its high-quality construction, some users may encounter minor problems with the simplehuman 40L slim step can. This section provides practical solutions to common issues.

Lid Not Closing Properly

If the lid fails to close fully, check for obstructions inside the can or improper liner placement. Ensure the liner is secured correctly and not interfering with the lid's path. Verify that the pedal is not stuck or damaged.

Pedal Feels Loose or Stiff

A loose or stiff pedal can result from accumulated debris or worn components. Clean around the pedal hinge and apply a suitable lubricant if necessary. If issues persist, contact simplehuman customer support for replacement parts.

Unpleasant Odors

Persistent odors may indicate the need for more frequent cleaning or liner replacement. Use baking soda or specialized trash can deodorizers inside the bucket to neutralize smells. Regular maintenance prevents odor buildup effectively.

- Open the lid using the foot pedal.
- Remove and empty the inner bucket.
- Replace with a properly sized liner secured on the liner rim.
- Wipe exterior surfaces regularly to prevent stains.
- Lubricate pedal mechanism if necessary for smooth operation.

Frequently Asked Questions

How do I assemble the simplehuman 40L slim step can?

To assemble the simplehuman 40L slim step can, first attach the pedal mechanism to the main body, then insert the liner pocket if included, and finally secure the lid. Detailed instructions are provided in the user manual included with the product.

What type of trash bags fit the simplehuman 40L slim step can?

The simplehuman 40L slim step can is designed to fit simplehuman code E liners or any tall kitchen bags with dimensions approximately 24 x 30 inches for a perfect fit without excess bag overhang.

How do I change the liner in the simplehuman 40L slim step can?

To change the liner, open the lid using the pedal, pull out the used bag by the edges, tie it securely, and dispose of it. Then, place a new liner inside the can, fold the edges over the rim, and close the lid.

What should I do if the step pedal of my simplehuman 40L slim step can is stuck?

If the pedal is stuck, check for any debris or obstructions around the pedal mechanism and clean if necessary. Lubricate the pedal hinge lightly with a silicone spray if needed. If the problem persists, contact simplehuman customer support.

Can I remove the liner pocket from the simplehuman 40L slim step can?

Yes, the liner pocket in the simplehuman 40L slim step can is removable for easy cleaning and replacement. Simply lift it out from the inside of the can.

How do I clean the simplehuman 40L slim step can?

To clean the can, remove the liner and any trash, wipe the interior and exterior with a damp cloth and mild detergent, then dry thoroughly. Avoid using abrasive cleaners as they may damage the finish.

Is there a way to adjust the lid closing speed on the simplehuman 40L slim step can?

The simplehuman 40L slim step can features a slow-close lid with an integrated dampening mechanism that cannot be manually adjusted. If the lid is not closing properly, check for obstructions or contact customer support for assistance.
