If the engine fails to start, the manual suggests checking the fuel supply, battery charge, ignition switch, and spark plug condition. It also advises verifying that safety switches are engaged and parking brake is applied. These checks help isolate the problem to either fuel, electrical, or safety system origins.

Hydrostatic Transmission Problems

Transmission issues such as slipping, hesitation, or failure to move can often be traced to low or contaminated fluid, worn belts, or pedal linkage problems. The manual guides users to inspect fluid levels and condition, check belt tension, and ensure pedals are properly adjusted. Addressing these factors usually restores normal transmission function.

Uneven Cutting or Poor Mower Performance

Uneven cutting may result from dull blades, improper deck height, or clogged discharge areas.
