2. **Insert Dowels:** If your model uses dowels, insert them into the side panel holes before attaching the end panels.
3. **Secure Everything:** Tighten the screws with a Phillips screwdriver, ensuring a snug fit.

Step 2: Install the Center Support Beam

Step 3: Add the Slats

1. **Lay Out Slats:** Place the slats evenly across the frame. Depending on the model, there may be pre-drilled holes for easy attachment.

2. Secure the Slats: Use screws or pegs (as specified in your instructions) to secure each slat in place. Ensure that they are evenly spaced to provide proper support for the mattress.

Step 4: Final Assembly of the Headboard and Footboard

1. Align Headboard and Footboard: If your bed frame includes a headboard and footboard, align them properly with the side panels.
2. Secure with Screws: Use the remaining screws to fasten the headboard and footboard to the side panels, ensuring they are stable and secure.

Step 5: Check Stability

1. Wobble Test: Once fully assembled, gently shake the frame to check for any wobbling. If there's movement, tighten all screws and connections.
