3. Clean the pod as needed, avoiding the fill port to prevent damage.

Replacing the Pods

Pods should be replaced periodically to ensure the best flavor and performance:

- Replace the pod if you notice a burnt taste or reduced vapor production.
- To replace the pod, simply pull it out and insert a new one.

Troubleshooting Common Issues

Even the best devices can encounter some issues. Here are common problems and their solutions:

Device Not Firing

- Solution: Check if the device is powered on. If not, press the fire button five times to turn it on. Ensure the pod is correctly attached and that it is filled with e-liquid.

Burnt Taste

- Solution: This can occur when the pod is empty or has been used for an extended period. Replace the pod and ensure it is filled adequately before use.

Weak Vapor Production

- Solution: Check the wattage settings and make sure they are appropriate for your pod. Additionally, ensure that the pod is not clogged and that it is filled with e-liquid.
