Social Security benefits are payments made to eligible retirees, disabled individuals, and survivors of deceased workers. The amount you receive can vary based on your earnings history, age at retirement, and other factors. However, many recipients are not aware that a portion of their Social Security benefits may be subject to federal income tax.

The Taxability of Social Security Benefits

The Internal Revenue Service (IRS) provides guidelines on how to determine if your Social Security benefits are taxable. Generally, if your combined income exceeds a certain threshold, you may have to pay taxes on a portion of your benefits. The combined income is calculated as follows:

- Adjusted Gross Income (AGI)
- Nontaxable interest
- 50% of Social Security benefits

The thresholds for determining taxability are:

- For individuals: \$25,000
