Solo Cayo Perico Heist Guide

The Cayo Perico Heist is one of the most lucrative and thrilling heists in Grand Theft Auto Online, allowing players to execute a solo mission on a private island. This guide will walk you through each step of the heist, from preparation to execution, ensuring you maximize your profits while minimizing risks. Whether you are a seasoned player or a newcomer to the game, this comprehensive guide will equip you with the knowledge and strategies needed to successfully complete the heist alone.

Understanding the Cayo Perico Heist

The Cayo Perico Heist takes place on a remote island owned by the notorious drug lord El Rubio. This heist is unique because it can be completed solo or with a team, making it ideal for players who prefer to tackle challenges independently. The heist consists of two main phases: preparation and execution.

The Benefits of Going Solo

1. **Increased Profit:** When you complete the heist solo, you keep 100% of the profits. This can lead to significant earnings, especially if you successfully execute the heist multiple times.
2. **No Coordination Required:** Working alone means you don't have to communicate or coordinate with other players, which can be challenging when distractions arise.
3. **Customizable Approach:** You can plan your approach without needing to compromise on tactics or strategies, allowing you to play in a way that suits your style.

Preparation Phase

Preparation is key to a successful heist. This phase involves gathering the necessary equipment, intel, and planning your approach.

1. Purchase the Kosatka Submarine

The Kosatka is essential for the Cayo Perico Heist, serving as your base of operations. To purchase it:

- Visit the Warstock Cache & Carry website through your in-game phone.
- Buy the Kosatka submarine for \$2,200,000. Ensure you have enough money before proceeding.

2. Conduct Reconnaissance

Once you own the Kosatka, you can begin reconnaissance missions. This step is crucial as it allows you to gather intel on the island and identify the best routes and targets.

- Launch the reconnaissance mission from the submarine.
- Use the periscope to survey the island.
- Identify potential entry points, guard locations, and the target loot (such as cash, gold, or artwork).

3. Plan Your Approach

You have various approaches to choose from, including stealth and aggressive methods. Here are some options:

- Stealth Approach: Focus on avoiding detection. Use silenced weapons and take out guards quietly.

- Aggressive Approach: Go in guns blazing and take out guards as needed. This is riskier but may be necessary depending on your play style.

Consider your strengths and weaknesses when deciding on an approach.

4. Gather Equipment

Before heading to the island, ensure you have the right equipment:

- Weapons: Bring silenced weapons for stealth, or heavy weaponry for an aggressive approach.
- Body Armor: Stock up on body armor to increase survivability.
- Health Packs: Bring health packs to recover during the mission.

Execution Phase

Once you've prepared adequately, it's time to execute the heist. This phase is where the real excitement begins.

1. Infiltrating the Island

After launching the heist from your Kosatka, you will be transported to the island. Here's how to infiltrate effectively:

- Choose your entry point wisely. Options include:
 - The main dock
 - The north or south side of the island
 - The drainage tunnel (requires a cutscene)

- If you opted for stealth, avoid any detection. Use cover and move quietly.

2. Gathering the Loot

Once inside, your primary goal is to gather loot. Here are the steps to follow:

- **Locate Your Target:** Head to the target location identified during reconnaissance. The targets can include:
 - Cash
 - Gold
 - Artwork
 - Cocaine
- **Looting:** Interact with the loot to collect it. Be mindful of guards in the area.
- **Secondary Loot:** After collecting your primary target, look for secondary loot items (e.g., jewelry, cash bundles) scattered around the compound. Collect these for additional profits.

3. Exiting the Island

Once you have gathered all the loot, it's time to leave the island. Your exit strategy is just as important as your entry:

- **Escape Routes:** Choose your escape route based on your approach:
 - For stealth, use the same route you entered.
 - For aggressive play, be prepared for combat as you exit.
- **Avoid Detection:** If you are detected, use the environment to your advantage. Utilize cover and plan your movement to avoid being shot.

- Get to the Boat or Plane: Once you reach the coast, you can either swim to your getaway boat or head to the airstrip for a plane extraction.
