### Effective Strategies

1. Start with the Longest Words: These are easier to spot and can help you find smaller words around them.
2. Look for Unique Letters: Identify letters that are less common, such as 'Z' or 'X.' These letters can help narrow down word choices.
3. Scan Methodically: Divide the grid into sections and scan through them systematically rather than randomly.
4. Use a Highlighter: If using paper, a highlighter can help keep track of found words while hunting for others.
5. Take Breaks: If you're stuck, take a short break. A fresh set of eyes can make a significant difference.
