Cleaning the Stapler

Wipe the exterior with a soft cloth to remove dust and fingerprints. Occasionally, clean the staple magazine and mechanism using compressed air or a small brush to clear dust and paper particles.

Clearing Jams

If a staple jam occurs, gently open the stapler and remove the jammed staple using tweezers or pliers. Avoid forcing the mechanism, as this can cause damage. Once cleared, reload staples and test the stapler on scrap paper.

Lubrication

Apply a small amount of light machine oil to the moving parts if stapling becomes stiff. This will ensure smooth operation without excessive force.
