Step 2: Adjusting Controls

The Infinite Reverb features several knobs and switches that allow for detailed sound shaping:

- Level: Adjusts the volume of the reverb effect.
- Tone: Controls the brightness or darkness of the reverb.
- Sustain: Sets the length of the reverb tail.
- Modulation: Engages and adjusts the modulation depth applied to the reverb.
- Infinite Switch: Activates the Infinite mode, allowing for continuous reverb.

Step 3: Experimenting with Settings

Take some time to play around with the various settings. Here are some tips for getting started:

- Start with the Level at about 12 o'clock and adjust from there based on your preference.
- Set the Tone to neutral and adjust while playing to find a sweet spot.
