The Role of Text Dependent Questions in CommonLit

Text dependent questions (TDQs) are a fundamental component of the CommonLit reading platform, designed to engage students directly with the text. These questions require learners to return to the passage to find evidence, ensuring that responses are grounded in the text rather than prior knowledge or opinion. By focusing on textual evidence, TDQs promote critical thinking and reading comprehension skills. CommonLit incorporates these questions across various genres and grade levels, making them a versatile tool for literacy development. The inclusion of TDQs aligns with educational standards that emphasize close reading and analytical reasoning. Definition and Purpose of Text Dependent Questions

Text dependent questions are inquiries that can only be answered through careful examination of a specific text. Their purpose is to deepen comprehension by requiring students to cite evidence directly from the reading material. Unlike broad or inferential questions, TDQs focus

exclusively on the content, structure, and language of the passage. This approach encourages students to engage in analytical reading practices and enhances their ability to dissect complex texts.

These questions vary in difficulty and type, including multiple-choice, short answer, and extended response formats. This variety promotes comprehensive assessment of student understanding.
