The Catch Guide Genshin

Genshin Impact, the popular action role-playing game developed by miHoYo, has captivated millions of players worldwide with its expansive open world, diverse characters, and intricate gameplay mechanics. Among the various elements that enhance the gaming experience, fishing has emerged as a unique and enjoyable activity. The Catch, a four-star polearm weapon available in Genshin Impact, stands out for its unique characteristics and benefits, particularly for characters who excel in dealing Electro damage. This guide will delve into The Catch, detailing its acquisition, attributes, best characters to equip it, and tips for maximizing its potential.

Understanding The Catch

The Catch is a four-star polearm that players can obtain through a fishing-related activity in Inazuma, the game's latest region. This weapon is primarily tailored for characters who utilize the Electro element, making it a valuable addition to any player's arsenal.

Weapon Stats and Passive Abilities

The Catch boasts impressive stats that make it a desirable weapon for many players:

- Base Attack: 42 (at Level 1)
- Max Attack: 510 (at Level 90)
- Secondary Stat: Energy Recharge (at Level 1: 10%; at Level 90: 45.9%)
- Passive Ability: "Catch of the Day"
- Increases the damage dealt by Elemental Burst by 16% and increases the damage dealt by the character's Elemental Burst by an additional 20% for 8 seconds after using it.

This combination of high base attack and energy recharge makes The Catch particularly effective for characters who rely on their Elemental Bursts to deal substantial damage.

How to Acquire The Catch

Acquiring The Catch is a process that requires players to engage in fishing, a relatively new mini-game introduced in Genshin Impact. Here's how to obtain this weapon:

Step-by-Step Process

1. Unlock Fishing: Fishing becomes available after completing the quest "Exploding Population" in Inazuma. You will need to speak to the NPC named "Kiseki" to start fishing.

2. **Gather Fishing Rods and Bait:** You will need to craft a fishing rod and gather bait. The “Fishing Rod” can be crafted at any crafting bench using local materials. Bait types include:
 - Fruit Paste Bait (for Dango)
 - Sautéed Matsutake Bait (for fish that prefer this type)
 - Special Bait (used for catching rare fish)
3. **Find Fishing Spots:** Explore the waters of Inazuma to find fishing spots. Look for areas with fish icons on the map.
4. **Catch Fish:** You will need to catch a specific number of fish known as “Koi” and “Golden Koi.” The exact requirements may vary, but typically you will need around 50 fish.
5. **Trade Fish for The Catch:** Once you have collected enough fish, visit the “Fishing Association” in Inazuma and trade them for The Catch. Be sure to check the exact exchange rate as it may change with updates.

Best Characters for The Catch

While The Catch can be utilized by any polearm-wielding character, certain characters benefit more from its attributes and passive abilities. Here are the top three characters that can make the best use of The Catch:

1. Fischl

- Element: Electro
- Role: Sub-DPS
- Why Use The Catch? Fischl's Elemental Burst, “Midnight Phantasmagoria,” summons Oz, a raven that continuously deals Electro damage. The Catch enhances her burst damage, making her a formidable sub-DPS character.

2. Xiangling

- Element: Pyro
- Role: Main DPS
- Why Use The Catch? While Xiangling primarily deals Pyro damage, the energy recharge provided by The Catch allows her to use her Elemental Burst more frequently. The weapon's passive ability can also complement her playstyle when combined with Electro characters.

3. Beidou

- Element: Electro
- Role: Main DPS/Tank
- Why Use The Catch? Beidou's Elemental Burst, “Stormbreaker,” allows her to counterattacks, dealing massive damage. The Catch significantly boosts her burst damage, making her an aggressive character that can withstand hits while dishing out punishment.

Maximizing The Catch's Potential

To truly harness the power of The Catch, players should follow a few strategies and tips to maximize its effectiveness during gameplay.

1. Team Composition

Creating a balanced team to complement The Catch's strengths is essential. Consider the following when forming your team:

- **Electro Characters:** Pairing The Catch with characters like Fischl or Beidou is beneficial for triggering elemental reactions such as Overloaded and Electro-Charged.
- **Sub-DPS Options:** Use characters that can provide elemental support, like Albedo or Bennett, to enhance overall damage and healing.

2. Artifacts

Choosing the right artifacts can further amplify The Catch's effectiveness:

- **Noblesse Oblige:** Increases Elemental Burst damage and provides a team-wide damage boost after using the burst.
- **Thundering Fury:** Boosts Electro damage and enhances elemental reaction damage.

Aim for a combination of these sets to maximize your characters' abilities.

3. Upgrade The Catch

Leveling up The Catch through ascension will increase its base attack and secondary stats. Collect the necessary materials to upgrade it to level 90 for maximum potential. Key materials include:

- Northlander Polearm Billet (for crafting)
- Mora (for upgrades)
- Local specialties (found in Inazuma)

4. Utilize Elemental Reactions

Understanding and utilizing elemental reactions is crucial for maximizing damage output. For instance:

- **Overloaded:** Triggered by combining Electro and Pyro.
- **Electro-Charged:** Triggered by combining Electro and Hydro.

By creating opportunities for these reactions, players can significantly increase their overall damage.

Conclusion

The Catch is more than just a weapon in Genshin Impact; it is a symbol of the game's diverse gameplay mechanics and offers players a unique way to enhance their character's abilities. Through fishing, players unlock not only a valuable weapon but also the potential for incredible gameplay experiences. By understanding its stats, acquiring it, and utilizing it effectively with the right characters and strategies, players can truly make the most of The Catch and elevate their Genshin Impact journey. Happy fishing!

Frequently Asked Questions

What is 'The Catch' weapon in Genshin Impact?

'The Catch' is a polearm weapon in Genshin Impact that is known for its ability to enhance the damage of Elemental Bursts and provide a significant boost to Energy Recharge.

How can players obtain 'The Catch' in Genshin Impact?
