Origins and Early Development of Skateboarding

The history of skateboarding staar answer key begins with the origins and early development of the sport in the mid-20th century. Skateboarding originated in California during the late 1940s and early 1950s as an offshoot of surfing. Surfers sought a way to mimic wave riding on land, leading to the creation of the first skateboards. These early boards were rudimentary, often made by attaching roller skate wheels to wooden planks. Skateboarding was initially referred to as "sidewalk surfing," reflecting its close ties to surfing culture.

First Skateboards and Materials

The earliest skateboards were handmade and featured simple wooden decks with metal or roller skate wheels.
