Historical Attempts to Seize the White House

Throughout American history, the White House has symbolized federal authority and the executive power of the United States government. Given its significance, it has been the target of various plots—both successful and foiled—that sought to seize control for political gain or ideological objectives. These attempts range from assassination conspiracies to armed insurrections and covert operations. The plot to seize the White House has often reflected deeper social and political unrest during turbulent times in the nation's history.

Early Plots and Assassination Attempts

One of the earliest notable incidents occurred during the War of 1812 when British forces invaded Washington, D.C., and set fire to the White House in 1814. While not a plot in the traditional sense of an internal conspiracy, it was a military attempt to seize the symbolic heart of American governance. Later, the assassination of President Abraham Lincoln in 1865 involved a broader conspiracy aimed at destabilizing the U.S. government during the Civil War's aftermath, indirectly threatening control of the executive office.

20th Century Conspiracies

The 20th century saw more sophisticated plots, including attempts by extremist groups to overthrow the government or kidnap officials. For example, the 1933 Business Plot was an alleged plan by wealthy businessmen to overthrow President Franklin D. Roosevelt and install a fascist regime. Although largely unproven, it exemplifies the kind of internal threats that have targeted the White House and the presidency.

Modern-Day Threats

In recent decades, the plot to seize the White House has taken new forms, including cyber-attacks, domestic terrorism, and attempts to undermine democratic processes. - Overthrowing democratic institutions

Disgruntled Military or Officials

Occasionally, plots have involved military personnel or government officials dissatisfied with leadership. Their insider knowledge and access can make such conspiracies particularly dangerous, as they may exploit vulnerabilities within the security framework.

Foreign Interference

Foreign governments or actors have also been suspected of attempting to influence or destabilize the U.S. government by targeting the White House. This can include espionage, cyber warfare, or covert operations intending to disrupt political processes or create chaos.

The plot to seize the White House employs a variety of tactics, depending on the context and the resources available to the conspirators. These methods can be violent or non-violent, overt or covert, and often involve complex planning.
