Character Development and Orbments

Character progression in Trails in the Sky SC centers on leveling up and customizing Orbments, which are devices used to equip Quartz. Experience points are earned through battles and quests, contributing to character levels. Each level-up increases base stats such as HP, EP, attack, defense, and agility. Tracking these improvements helps in tailoring characters to specific roles within the party.

Quartz are gems slotted into Orbment devices to provide magic spells, passive effects, or status enhancements. Different Quartz types correspond to various elemental attacks, healing abilities, or buffs. Players should balance their Quartz loadout to complement each character's strengths and weaknesses.
