Understanding these criteria will allow players to focus their strategies effectively.

Pre-Mission Preparation

Before diving into a mission, adequate preparation is crucial. The following steps will help ensure your squad is ready for battle:

1. Squad Composition

Choosing the right squad members is vital for mission success. Consider the following:

- Diversity in Roles: Include a mix of Scouts, Shocktroopers, Engineers, and Snipers to handle different situations.
- Level and Skills: Select characters that are at a higher level and possess useful skills for the mission at hand.
- Class Synergy: Pair units that complement each other, such as Scouts for reconnaissance and Shocktroopers for frontline assaults.

2. Equipment and Upgrades

Before starting a mission, ensure your units are equipped with the best weapons and gear available:

- Weapons: Equip each character with the most effective weapons tailored to the enemies you will face.
- Grenades and Items: Carry a variety of grenades and healing items to adapt to different combat situations.
- Upgrades: Upgrade your weapons and armor using the resources available to enhance their performance.

Mission Strategy

Once the mission begins, employing a solid strategy is key to achieving A Rank. Here are some tips to optimize your approach:

1. Efficient Movement

- Scout First: Always deploy Scouts to explore the battlefield and reveal enemy positions. This allows for informed decision-making on unit movements.
- Use Cover: Position your units behind cover to minimize damage from enemy fire.
- Flanking Maneuvers: Flanking can deal significant damage and reduce casualties. Utilize terrain to your advantage to surprise enemies.

2. Command Point Management

- Use Command Points Wisely: Limit the use of command points to avoid penalties. Think critically about when to use them and save some for crucial moments.
- Support Actions: Use command points to allow for extra actions, especially for units in peril or those needing to secure objectives.

3. Prioritize Objectives

- Focus on Primary Objectives: Completing primary objectives should be your main focus. Secondary objectives can be pursued when time allows.
- Time Management: Keep track of the remaining turns. If a mission is nearing its end, prioritize finishing objectives over taking out enemies.

3. Vehicle Utilization

- Tank Support: Don't forget to use your tank effectively. It can absorb damage and deal significant firepower, which is invaluable in tougher missions.
- Coordinate Attacks: Use vehicles to draw enemy fire while your infantry flanks or assaults from the sides.

Post-Mission Evaluation

After every mission, take the time to assess your performance. This evaluation is crucial for improving your future runs.

1. Analyze Turn Count and Casualties

Review how many turns you took and how many casualties occurred. If the numbers are high, consider adjusting your strategy and execution.
