5. Allow for Recovery

Muscles need time to recover and grow stronger. Ensure you have at least one rest day between workouts targeting the same muscle group.

Tips for Safe and Effective Weight Training

Safety should always be a priority when weight training. Here are some tips to keep in mind:

1. Warm-Up and Cool Down

Always begin with a warm-up to prepare your muscles and joints. Follow your workout with a cool-down and stretching session to prevent injury.
