Example Answers

1. $12 \text{ glass slippers} - 3 \text{ given away} = 9 \text{ slippers left.}$
2. $24 \text{ pictures} - 8 \text{ blurry} = 16 \text{ good pictures.}$
3. $4 \text{ mice} \times 0.5 \text{ passengers each} = 2 \text{ passengers; } 6 \text{ total} - 2 = 4 \text{ passengers can still fit.}$
4. Cinderella leaves at 11:45 PM; photographer arrives 15 minutes late $\rightarrow$ 12:00 AM (midnight).
5. $\frac{3}{5} \times 20 \text{ pictures} = 12 \text{ pictures with Cinderella smiling.}$
