Translation Philosophy

The NRSV Bible embraces a philosophy of "equivalence," which strives to balance fidelity to the original text with clarity in contemporary English. This approach is characterized by two main principles: formal equivalence and dynamic equivalence.

Formal Equivalence vs. Dynamic Equivalence

- **Formal Equivalence:** This approach focuses on a word-for-word translation. It aims to stay as close as possible to the original language, which can be

beneficial for in-depth study.

- **Dynamic Equivalence:** This method emphasizes thought-for-thought translation, making the text more readable and understandable to modern audiences.

The NRSV employs a combination of these approaches, allowing it to be both accurate and approachable.

One of the most notable aspects of the NRSV is its use of inclusive language. The translators aimed to avoid gender-specific language where it does not reflect the original texts' intent.
