By reviewing these elements, the explanation becomes clear and aligns with the educational goals of understanding cause and effect within the story.

## Environmental and Road Conditions

The story highlights that the road Karjam was traveling on had several sharp objects and uneven surfaces. These hazardous conditions increase the likelihood of tire punctures. The answer key points out that

encountering debris such as nails, sharp stones, or glass can lead to a flat tire. Karjam's route was through a less maintained area, which further raised the risk of tire damage.

## **Pre-existing Tire Wear and Maintenance**

Another critical factor was the state of Karjam's tire before the journey began. The answer key notes that worn-out tires or those with inadequate air pressure are more vulnerable to flats. Karjam did not conduct a thorough check on the tires, which contributed to the tire's inability to withstand the road's rough conditions. This oversight is a pivotal detail in understanding the cause of the flat tire.
