1. Analyze the Pieces

Before diving into assembly, take time to analyze each piece. Consider the following:

- Shape: Look at how each piece is shaped and identify any distinguishing features.
- Size: Note the dimensions of each piece and how they might fit together.
- Orientation: Determine if any pieces need to be flipped or rotated to fit properly.

2. Start with the Base

Most pyramid puzzles are designed to be built from the bottom up. Start by assembling the base layer of the pyramid:

- Flat Surface: Ensure that you are working on a flat surface to avoid any instability.
- Arrange Pieces: Place the largest pieces at the bottom, gradually building up with smaller pieces as you go.

3. Use the Process of Elimination

If certain pieces don't seem to fit, remove them from consideration temporarily. This can help clear up confusion and streamline the assembly process.
