Common Repairs for Yamaha RXK 135

While the Yamaha RXK 135 is a reliable motorcycle, like any machine, it may require repairs from time to time. Here are some common repairs that owners often encounter:

1. Carburetor Cleaning

Clogged carburetors can cause starting issues and poor performance. To clean the carburetor:

- Remove the carburetor from the engine.
- Disassemble it carefully, noting the arrangement of parts.
- Use carburetor cleaner and compressed air to remove dirt and debris.
- Reassemble and reinstall the carburetor.

2. Brake Pad Replacement

Worn brake pads can compromise safety. To replace them:

- Remove the wheel and brake caliper.
- Take out the old brake pads and replace them with new ones.
- Ensure that all components are reassembled correctly and test the brakes before riding.

3. Chain Maintenance

A well-maintained chain is crucial for smooth riding. To maintain the chain:

- Clean the chain using a suitable cleaner.
- Lubricate with chain oil.
- Adjust the tension according to specifications.

4. Electrical System Repairs

Electrical issues can be tricky. Common repairs include:

- Replacing fuses.
- Checking battery connections and terminals.
- Inspecting wiring for any damage or wear.
