Unboxing Your Yi IoT Light Bulb Camera

When you receive your Yi IoT Light Bulb Camera, ensure that you have the following items in the box:

- Yi IoT Light Bulb Camera
- User Manual
- Warranty Card

It is essential to inspect the packaging for any physical damage. If you notice any issues, contact the retailer for a replacement.

Installation Process

Installing the Yi IoT Light Bulb Camera is straightforward. Follow these steps to ensure proper installation:

Step 1: Gather Required Tools

You won't need many tools for installation, but having the following can be helpful:

- Step Ladder (if needed)
- Smartphone with the Yi Home App installed

Step 2: Turn Off Power

Before installing the camera, turn off the power to the light fixture where the camera will be installed. This is crucial for your safety.

Step 3: Remove Existing Bulb

If there is an existing bulb in the socket, carefully remove it. Ensure the socket is free of dust and debris.

Step 4: Install the Yi IoT Light Bulb Camera

Screw the Yi IoT Light Bulb Camera into the light socket just like a regular bulb. Ensure it is firmly in place but do not overtighten.

Step 5: Restore Power

Once the camera is securely installed, turn the power back on to the light fixture.

Step 6: Connect to the Wi-Fi Network

1. Open the Yi Home App: Download the Yi Home App from the App Store or Google Play Store if you haven't already.

2. Create an Account or Log In: Follow the prompts to either create a new account or log in with your existing credentials.
3. Add Device: Tap on the "+" icon to add a new device.
4. Select "Light Bulb Camera": Follow the on-screen instructions to select your device type.
5. Connect to Wi-Fi: Enter your Wi-Fi credentials to connect the camera to your network.

Setting Up Features

Once your Yi IoT Light Bulb Camera is connected, you can begin to configure its various features.

Adjusting Camera Settings

You can adjust settings directly from the Yi Home app. Here are some customizable options:

1. Resolution: Choose between different video quality settings.
2. Motion Detection Sensitivity: Set the sensitivity level for motion alerts.
3. Notification Preferences: Enable or disable notifications for motion detection and other alerts.
4. Recording Settings: Choose to save recordings locally or to the cloud (if subscribed).

Using the Two-Way Audio Feature

The two-way audio function allows communication through the camera. To use this feature:

1. Open the Yi Home App: Select your camera.
2. Tap on the Microphone Icon: This will enable the microphone.
3. Speak into Your Phone: Your voice will be transmitted through the camera's speaker.

Viewing Live Feed

To view the live feed from your camera:

1. Open the Yi Home App: Log in if you are not already.
